FOR IMMEDIATE RELEASE

Leading Analyst Suggests Now is the Time to Evaluate BCP Software Solutions

Plymouth Meeting, PA – June 10, 2008. A leading analyst of Business Continuity Planning, Gartner Research, has issued a paper suggesting that the planned acquisition of Strohl Systems Group, Inc. by SunGard Data Systems, Inc. could create instabilities in Strohl's Business Continuity Planning (BCP) software.

“The acquisition, which will remove SunGard's most important competitor, presents an opportunity for another market player to move into the No. 2 position. Issues including pricing, ease of use, and configuration and training flexibility will give these competitive players an opportunity to take current SunGard/Strohl customers,” as stated in the Gartner Research publication dated May 22, 2008. The document is available online at http://www.gartner.com/resources/158200/158275/sungards_strohl_acquisition_158275.pdf.

With increased visibility and pressure on companies to ensure the continued security of their enterprises, Frank Perlmutter, President of Strategic BCP, a leader in Business Continuity Planning said, “We see this acquisition as an opportunity to reach out to those who want cutting-edge technology combined with the human interaction and a hands-on approach that we provide.”

“Strategic BCP continues to push the technological envelope with our flagship BCP tool, ResilienceOne™. We offer unmatched organizational stability and deliver a solution that is quickly implemented and easy to use,” said Josh Young, Strategic BCP's Director of Sales. “This combination, paired with the industry's most comprehensive service level agreements, allows Strategic BCP to boast a 100% client retention rate since its inception.”

About Strategic BCP

Strategic BCP is a Business Continuity Planning company driven to empower clients by building cost-effective, compliant plans. Business Continuity Planning is a discipline dedicated to helping organizations recover business operations, restore IT infrastructure, and protect people in the event of an emergency.

Strategic BCP provides its core plan functionality through ResilienceONE™, a unique risk-based planning tool. ResilienceONE™ is a fully-integrated, Software as a Service (SaaS) BCP system. This streamlined platform was built on the philosophy of autonomy, giving each client the means to effectively implement their plan during a crisis.
